

ATMOSPHERIC TANK

Stainless steel
For foam concentrate
Horizontal & Vertical

PRODUCT DESCRIPTION

The stainless steel atmospheric tank from is made of stainless steel AISI 304 or AISI 316, and it has been designed to storage foam concentrate in firefighting systems.

The high density and high quality of these tanks are compatible with AG Fire Sprinkler foam concentrates. They are typically used with proportioners and deluge valves to mix the concentrate and conduct the mixture into the foam system.

TECHNICAL DATA

Model	Stainless steel atmospheric tank for foam concentrate
Storage capacity	200 L to 5.000 L (52,83 to 1320,86 gal) Other sizes available under request
Working pressure	Atmospheric pressure
Working temperature	-30°C to 60°C (-22°F to 140°F)
Liquids density	≤ 1,4 kg/l
Materials	Stainless Steel AISI 304 or AISI 316
Finish	Red RAL 3000

COMPONENTS

ITEM	ACCESORIES
1	Air vent
2	Probe tube
3	Visual level indicator connection
4	Suction connection
5	Drain connection
6	Lifting hook
7	Pressure gauge connection
8	Fill connection
9	Manhole
Suction, drain... valves are sold separately	
Other components available under request	

HORIZONTAL ATMOSPHERIC TANK

VERTICAL ATMOSPHERIC TANK

INSTALLATION, TESTING AND MAINTENANCE

The atmospheric tank must be installed, inspected and tested by a qualified and trained person.

After few initial successful test, a trained person must inspect and test the system. It is recommended to carry out physical inspection of the system regularly. The system must be fully tested at least once in a year or in accordance with applicable NFPA codes or in accordance to the standard of the organization having local jurisdiction.

The owner is responsible for maintenance of the tank in proper operating condition.

It is advisable to leave enough space around the tank, free of walls or other obstacles, for connecting the foam system piping and supports.

AG FIRE SPRINKLER

AG Fire Sprinkler offers a wide selection of components. Then a list of products is presented by AG Fire Sprinkler, we can offer all these components, made with precision to protect people, anywhere, anytime.

- Sprinklers
 - Standard Coverage
 - Extended Coverage
 - Storage
 - Dry
 - Accessories
- System Valves
 - Wet
 - Dry
 - Preaction Equipment
 - Accessories
- Spray System Open Nozzles
 - High Velocity Nozzles
 - Medium Velocity Nozzles
 - Window Nozzles
 - Hydroshield Nozzles
 - Mushroom Type Nozzles
- Foam equipment
 - Tanks
 - Proportioners
 - Foam Discharge Equipment
 - Foam Concentrates
- Deluge equipment for Water Spray and Foam
 - Clapper Deluge Valves
 - Diaphragm Deluge Valves
- Monitors
 - Manual Monitors
 - Remote Monitors
 - Monitor Nozzles
 - Towers and Trolleys
- Valves
 - Butterfly Valves
 - Gate Valves
 - Check Valves
 - Pressure Control Valves
 - Test and Drain
 - Hose, Hydrant and Fire Connection Valves
 - Fire Department Connections

The equipment presented in this bulletin is to be installed in accordance with the latest published Standard of the National Fire Protection Association, Factory Mutual Research Corporation, or other similar organizations and also with the provisions of governmental codes or ordinances whenever applicable. This documentation is not contractual. AG Fire Sprinkler reserves the right to any kind of change without notice.
